

PA31004

Primary EnduraPanel Air Element

PA31005, PA31007

Secondary EnduraPanel Air Elements

NEW RELEASE

Baldwin's new line of EnduraPanel air filters, including the PA31004, are built to last. They deliver superior efficiency throughout the entire service interval with dirt holding capacity surpassing the OE filters. Structural endurance testing proves once again that Baldwin exceeds the OE performance.

The Secondary EnduraPanel Air Elements come in two configurations. The PA31005 with foam media should be used on models with a Mass Air Flow (MAF) Sensor installed. The PA31007 with pleated media is intended for models without the sensor.
